02_Lab

```
$n = 1;
$s = "1";
$n1 = $n + $s;
$n2 = $n1 + "10 little penguins"
$n3 = "hello";
$n4 = " world";
$n5 = $n3+$n4;
$n6 = $n3.$n4;
```

Why did I get this output?

I would like to inform you that I have discovered the issue within the LAB assignment which is a typo that includes the symbol (+) it only works on java not php because php uses a (.) and there is no print statement (echo) that's why I had an issue with code. Furthermore there is no <?php ?> .
